5. Changing/deleting read-out files.

1. Installing the USB Print Manager

To use the USB Print Manager you will need the following items:

- CD including the USB Print Manager software for the download
- USB-Cable
- Power supply
- User Guide

Install the PM Setup program using the CD.

An icon will appear on your desktop.

The USB Print Manager

Will be launched when you double click the icon.

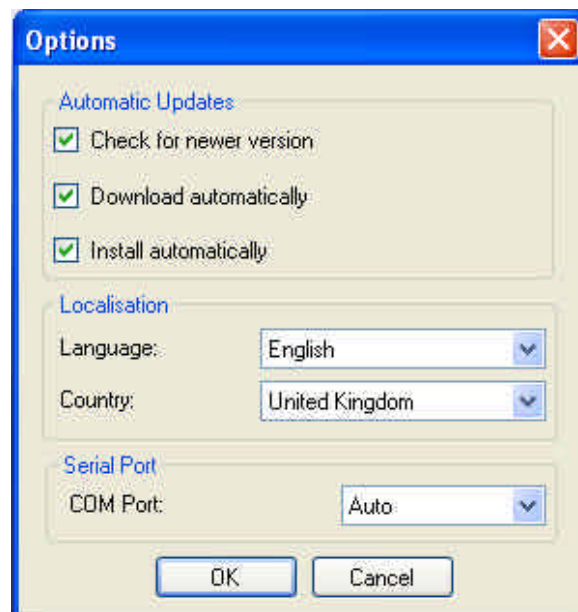

The fanciers clock is not included in the USB Print Manager package. The fanciers clock can be a Bricon Little 1000 NL or a Speedy clock.

2. Connecting the fanciers clock.

- Connect the included USB cable into the USB port of your PC.
- Connect the other side of the cable to the fanciers clock.
- Connect the power supply..

3. Options

3.1 Automatic updates

- If the USB Print Manager is installed on a PC that has an active internet connection, the program will automatically search for an update..
- If the boxes for automatical updates and automatical installement are checked, the updates will automatically be downloaded and installed..
- We recommend to check these boxes.

3.2 Choose language / Country

- Here you can set your preferred language and country.

3.3 Communication port

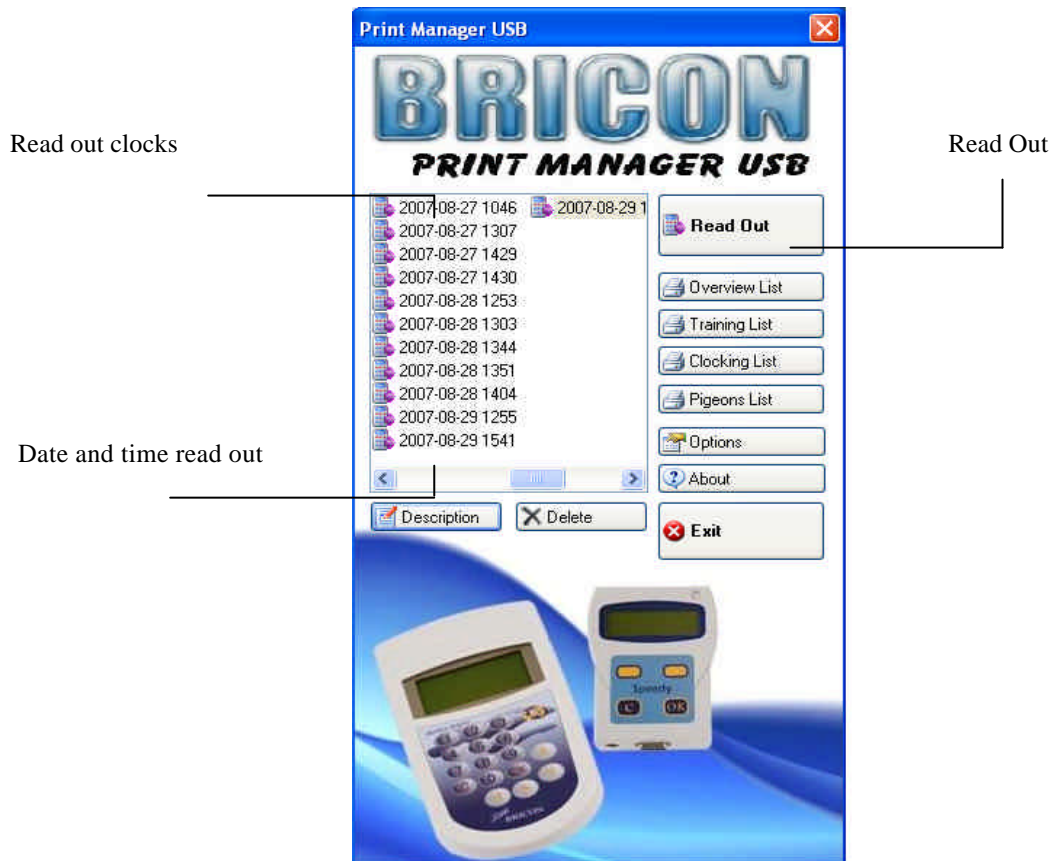

- Here you can set the communication port..
- If you have chosen the option ' auto ' the Print Manager will automatically select the port where you have connected the cable..
- Attention ! Connect the cable before starting the USB Print Manager program.

4.0 Read Out.

- Connect the USB cable and the power supply as explained on page 4..
- Start up the USB Print Manager
- Choose Read out
- On your screen you will see a pop up requesting to connect the fanciers clock.
- Connect the fanciers clock.
- .The fanciers clock will go into slave mode.
- After the read out, the left hand column will show all data's.

Fig.1
