

Guide ring Pliers

The ring to the leg

Place the pliers as shown in the figure.

Move the legs of the pliers (out), so the rings opens..
Now you can easily put the ring on the leg of the pigeon.

Release the legs of the pliers. This will return the spring in the normal position.

You can remove now the pliers.

To remove the ring. Work on the same way.

First place the pliers to the ring.

Open the legs of the pliers , now you can easily remove the ring.

Insert the stick in the ring

Insert the stick into the opening and push it further into the ring.

To completely mount the stick in the ring, use the pliers ,

If the stick is properly attached you hear a click, and you see at the bottom the end of the stick.

Use the pliers as show in the figure.

Remove the stick

Place the pliers like the picture. Close the pliers so the ring comes up.

Then you lift the stick completely out of the ring, like a bottle opener.

Warning : place the flat side of the pliers to the ring, so the tilted side of the pliers push the stick up.
